Spanner Crab meat is an incredibly versatile, delicate and sweet white flesh product. Only whole live crab is chilled in a brine solution to -2°C, until insensitive, and then the raw meat is extracted by hand, prior to packaging and freezing using the Rock Salt Freezing (RSF) process.

The crab meat is individually vacuum sealed 500 gram (1lb) or on MAP barrier tray. For cooked meat, raw product is steamed in the vacuum sealed bag. This product can be frozen using the RSF process or used fresh.
